User Guide

MODEL: GG1217

Thank you for choosing Grout Groovy™

Thank you for purchasing the Grout Groovy™ grout cleaning machine! All of our knowledge and experience with floor care has come together to complete this one-of-a-kind, electric grout cleaner. It’s an incredibly lightweight, safe, and easy way to clean dirty tile grout anywhere in your home. Save time, money, your back and knees.

Limited Warranty

The Grout Groovy™ has a 5-year limited warranty. This limited warranty is for normal, home use. The limited warranty does not cover commercial use and is void if used commercially. The nylon cleaning brush is not covered under warranty. It will eventually wear down after extended use. Contact Grout Groovy™ for parts and for service. Other failures, resulting from improper use, maliciousness, and deliberate abuse, improper or “non-approved” components replacing the factory ones, operator error, or typical wear and tear may result in the item not being covered under warranty.

PLEASE DO NOT RETURN THIS PRODUCT TO THE PLACE OF PURCHASE.

We want you to be completely satisfied with your purchase.

Please contact us with any questions or concerns. The team at Grout Groovy™ is happy to be of service.

Safety Instructions

SAFETY INSTRUCTIONS

• Keep the power cord away from sharp objects.
• Keep your hands and feet away from cleaning brush.
• Always wear shoes that are not slippery so you do not fall on wet floor, and keep hands and feet away from the cleaning brush.
• Never use replacement parts and accessories not provided or recommended by the manufacturer.
• If the cord becomes damaged during use, disconnect the cord from the power supply immediately and discontinue use.
• Remove the plug from the wall socket after using the machine, before servicing, or when the machine is not in use.
• Do not immerse the machine in water or other liquid.
• Do not use the machine if the guard is damaged or worn.
• Make sure that the cleaning brush is properly secure to the machine in accordance with the instructions.
• Do not use worn cleaning brushes.
• Only use the machine in an upright position, with the cleaning brush pointing to the ground.

WARNING!

When using the machine the safety rules contained in this manual must be followed. For your own safety and bystanders please read these instructions before operating the machine.

WARNING!

Beware that after releasing the trigger the cleaning brush may continue to rotate for a short period.
PARTS LIST (fig. B)
1) Detail corner brush
2) Wrench
3) Phillips screwdriver
4) Phillips machine screw

NOTICE!
The traction band is hypoalergenic and made of EPDM rubber. The nylon brush is made from antimicrobial filament and resists mold and mildew.
Quick Start Guide

1. Assemble the Grout Groovy™ (fig. C).
   • Insert the top of the machine, (1) containing the handle and trigger, into the bottom of the machine (3). It will only go together one way.
   • Insert the Phillips machine screw (2) into the hole that is now aligned and tighten with the screw driver provided in the parts package. Just snug it - don’t over tighten!

2. Prepare the surface to be cleaned.
   • Apply liquid soap or a mild household cleaning solution to your grout.
   • Work in small areas to avoid getting too much water or cleaning solution on the floor at once.

3. To use Grout Groovy™ (fig. A, pg 4), depress the safety button on the main handle and squeeze the on/off trigger.
   • To turn the machine off release the on/off trigger.
   • Holding the machine with both hands, make sure the underside of the machine is kept level and guide the machine at a constant speed over the grout area moving forward and backward similar to using a vacuum cleaner.
   • There is no need to apply pressure. The nylon brush provides plenty of scrubbing power.

4. For stubborn, dirty grout, repeat if necessary.

5. For corners and tight spaces use the detail corner brush (fig. B, pg 4).

6. After grout is clean, mop or towel floor until dry.
INSTALLING A NEW CLEANING BRUSH (fig. D)

• Unplug the machine from power source.
• Remove the old nylon cleaning brush by loosening the spindle nut (2) while holding the spindle (4) using the supplied screwdriver (3).
• Insert the shaft of the new brush onto the spindle with the cut out of the hub facing the machine.
• When mounting the brush wheel, use the wrench (1) provided to avoid damage to the machine.
• Tighten the spindle nut while holding the spindle using the supplied screw driver (3). Don’t over tighten!
STORING THE MACHINE WHEN NOT IN USE
The machine should be stored in such a manner that it is protected against the effects of:
• High humidity, heat, submerged in water or use with cleaning products/chemicals may cause damage to the cleaning brush or machine.
• Exposure to acids, or fumes from acids, which might induce deterioration.
• Any temperature low enough to cause condensation on the cleaning brush when removed from storage to an area of higher temperature.
PLEASE DO NOT RETURN THIS PRODUCT TO THE PLACE OF PURCHASE.
We want you to be completely satisfied with your purchase.

Please contact us with any questions or concerns. The team at Grout Groovy™ is happy to be of service. Contact us directly at 727-431-9364.
